INDEXES

Subject Index to Volume 9

A

Adaptation
  freeze tolerance, physiological responses, vertebrates, 252
  intestinal sugar transport, 84
  mechanoreceptors, 158
Adenohypophysial cells, single, control of exocytotic secretion in, 219
Adenosine triphosphate, potassium current oscillation induced by, megakaryocytes, 49
Alkalosis, sustained, cell transformation induced by, 165
Amino acids, central neurotransmitters, baroreceptor reflex pathway, 243
Angiotensin II, renal cytokine, 40
Antidiuretic hormone. *see* Vasopressin
ATP. *see* Adenosine triphosphate
Autonomic neurotransmission, heart, neuropeptides and, 174

B

Baroreceptor reflex pathway, amino acids as central neurotransmitters in, 243
Behavioral control, breathing, 228
Biological clock, negative feedback in (Trendsetters), 195
Blinking, fleeting memories (Trendsetters), 47
Blood pressure, serum immunoglobulin G levels and, untreated hypertension, 27
Bone, actions of IGF and insulin on, 20
Brain
  cytokines in health and disease, 138
  macrophages, 80
Breathing. *see* Respiration

C

Calcium, long-term depression and potentiation, hippocampus, 256
Calcium channels, P-type, transmitter release and, nerve terminals, 101
Calcium ions, intramitochondrial, signal transduction by, mammalian energy metabolism, 71
Carotid body, chromophores in oxygen chemoreception, 161
Catecholamines, dopamine β-hydroxylase deficiency and, 35
Cell death, (Trendsetters), 2, 280
Cell membrane, early developments (Perspectives), 147
Cell proliferation, potassium channel role in, 105
Cell shapes (Trendsetters), 239
Cell transformation, alkaline stress-induced, 165
Cellular environment, importance, extracellular matrix, 110
Cell volume, changes, 223
Central nervous system
  macrophages in the brain, 80
  neuronal microenvironment, glial function in homeostasis, 265
cGMP. *see* Guanosine monophosphate, cyclic
Chemoreception, oxygen, chromophores in, carotid body model, 161
Cheyne-Stokes breathing (Notes), 96
Chloride, secretion, epididymis, 31
Chromophores, oxygen chemoreception, carotid body model, 161
Circadian rhythms, negative feedback in biological clock (Trendsetters), 195
Cyclic ADP-ribose, mediation, cGMP and nitric oxide effects, 134
Cytokines
  brain, health and disease, 138
  renal, angiotensin II as, 40

D

Diabetes, immune response to neuronal enzyme, pancreas (Trendsetters), 1
Dopamine, renal, source and handling of, 128
Dopamine β-hydroxylase, deficiency, 35

E

Edema
  foot swelling, upright position, 214
  formation, renal nerves and, 183
Editorials, 151
Electrolytes, secretion, epididymis, 31
Emesis. *see* Vomiting
Endothelial cells, surface imaging, 153
Endothelium-derived relaxing factor, role in glomerular arterioles and macula densa, 115
Energy metabolism, mammalian, signal transduction by calcium ions, 71
Epididymis, chloride secretion from, 31
Epinephrine, dopamine β-hydroxylase deficiency and, 35
Epithelial cells, transformation, alkaline stress-induced, 165
Erythrocytes, rheology, velocity of oxygen transfer and, 22
Exocytosis, control of, single adenohypophysial cells, 219
Extracellular matrix, importance of cellular environment, 110

F

Feedback, negative, biological clock (Trendsetters), 195
Fibrosis, hormones and, loss reciprocal regulation, 123
Fluid, pump mechanisms, initial lymphatics, 67
Force transduction, hemodynamic, endothelial cell surface imaging, 153
Freeze tolerance, physiological responses, vertebrates, 252

G

Gene therapy (Trendsetters), 99
Genetics, molecular, hypertension, 246
Glial cells, function in homeostasis, neuronal microenvironment, 265
G protein, nitric oxide synthase (Trendsetters), 240
Guanosine monophosphate, cyclic, cyclic ADP-ribose effects, 134

H

Heart
  sinus node cells, mammalian, sensitivity of, 77
  vagal regulation of, neuropeptide effects, 174
Hippocampus, long-term depression and potentiation in, calcium and, 256
Hormones, fibrosis and, loss reciprocal regulation, 123
Hypertension
  experimental inherited, pituitary-adrenocortical function and, 7
  genetics of, 246
  nitric oxide inhibition in, 268
  pathophysiology of, immunoregulatory failure in, 27
Hypoxia, uterine, contractions and, 88

I

IGF. *see* Insulin-like growth factor
Immune response, neuronal enzyme, pancreas, diabetes and (Trendsetters), 1
Immunoglobulin G, serum levels, untreated hypertension, 27
Immunoregulation, failure of, pathophysiology of hypertension, 27
Infection, resistance, intracellular parasites, mice, 178
Insulin, actions, bone, 20
Insulin-like growth factor, actions, bone, 20
Interleukin, brain, health and disease, 138
International Union of Physiological Sciences
  Commissions, 279
  Executive Committee meeting (News From IUPS), 237
Intestines, sugar transport, rapid adaptation of, 84
Ionic currents, voltage-dependent, structural correlates of, 169
Ions, biological recognition (Trendsetters), 47

J

Juxtaglomerular cells, models, 188

K

Kidney, dopamine, source and handling of, 128
Kidney cells, oncogene-transformed lines, physiological and oncogenetic studies, 208
Kidney glomerulus
  arterioles, nitric oxide role in, 115
  inflammation, mesangial cells and, 271

L

Lavoisier (Notes), 148, (Historical Perspectives), 276
Lung, surfactant secretion, 13
Lymphatics, initial, fluid pump mechanisms, 67

M

Macrophages, brain, 80
Macula densa, nitric oxide role in, 115
Mechanoreceptors
  adaptation, molecular mechanisms of, 53
  rapid adaptation, 158
Megakaryocytes, potassium current oscillation in, ATP-induced, 49
Mesangial cells, renal glomerular inflammation and, 271
Microvessels, role in oxygen supply to tissue, 119
Molecular biology, integrative physiology in (Perspectives), 93
Muscle
  striated, tension in, myofilament lattice spacing and, 3
  use of, atrophy and (Trendsetters), 239
Myofilament lattice, spacing, tension in striated muscle and, 3

N

Neonate, sympathetic systems in, spectral analysis, 233
Nephron, development of (Trendsetters), 194
Neurons, microenvironment, glial function in homeostasis, 265
Neuropeptides, vagal regulation and, heart, 174
Neurotransmitters, amino acids as, baroreceptor reflex pathway, 243

Nitric oxide
cyclic ADP-ribose effects, 134
glomerular arterioles and macula densa, 115
inhibition, hypertension, 268
Nitric oxide synthase
G protein-coupled (Trendsetters), 240
molecular biology to cerebrovascular physiology, 64
Nociceptive reflexes, spinal, modular organization, 261
Norepinephrine, dopamine β-hydroxylase deficiency and, 35
Nuclear magnetic resonance, consequences of transgene expression, 197

O

Oncogenes, inducible, renal cell lines, 208
Oxygen
chemoreception, chromophores in, carotid body model, 161
supply, tissues, microvessel role in, 119
transfer, velocity of, erythrocytes, 22

P

Pancreas, neuronal enzyme in, diabetes and (Trendsetters), 1
Parasites, intracellular, resistance to infection, mice, 178
Peptides, bombesin-like, role in satiety (Trendsetters), 193
Physiology
father of American physiology (Notes), 43
integrative (Perspectives), 93
Pituitary-adrenocortical function, hypertension and, 7
Posture, upright position, foot swelling in, 214
Potassium channels
function, structural correlates of, 169
role in cell proliferations, 105
single transmembrane segments (Letter), 45
Potassium current, oscillation, ATP-induced, megakaryocytes, 49
Pregnancy, uterine contractions, hypoxia effects, 88
Pulmonary surfactant system, 13

Q

Quanta, synaptic transmitter release, 59

R

Renal nerves, role in edema formation, 183
Renin, circulating, juxtaglomerular cells, models of, 188
Renin-angiotensin axis, function, renal cytokines and, 40
Resistance, natural, intracellular parasites, mice, 178
Respiration
behavioral control of, 228
Cheyne-Stokes breathing (Notes), 96
nature of (Notes), 148
Rheology, erythrocyte, velocity of oxygen transfer and, 22

S

Satiety, bombesin-like peptides in (Trendsetters), 193
Signal transduction, intramitochondrial calcium ions, mammalian energy metabolism, 71
Sinoatrial node cells, heart, mammalian, sensitivity of, 77
Sodium, retention, renal, sympathetic nerve activity and, 183
Spectral analysis, neonatal sympathetic systems, 233
Spine, nociceptive reflexes, modular organization, 261
Spontaneous combustion (Historical Perspectives), 276
Stimulus-secretion coupling, exocytotic secretion, single adenohypophysial cells, 219
Subquantal transmitter, vesicular or quantal, release, 59
Sugar, transport, intestinal, 84
Surfactant, secretion, pulmonary, 13
Swelling, foot, upright position, 214
Sympathetic nerves
neuropeptides in, vagal regulation of the heart and, 174
renal, edema formation and, 183
traffic, intraneural recordings of, 203
Sympathetic systems, neonatal, spectral analysis, 233
Synapses, transmitter release, P-type calcium channels and, 101

T

Tissue, oxygen supply to, microvessel role in, 119
Transgene expression, consequences of, nuclear magnetic resonance detection of, 197
Transmembrane segments, single, channels with (Letter), 45
Transmitter
release, P-type calcium channels and, nerve terminals, 101
subquantal, release, 59
Tumor cells, proliferation, potassium channel role in, 105

U

Uterus, hypoxia, contractions and, 88

V

Vasopressin, nonosmotic release (Trendsetters), 280
Vomiting, review, 142
